TITLE INDEX TO VOLUME 6

Compiling Control, 135
Computable Semantics for General Logic Programs, A, 269

Extending SLD Resolution to Equational Horn Clauses Using *E*-Unification, 3

High-Performance Low Risc Machine for Logic Programming, A, 179

Implementation of Narrowing, An, 57

Logical Analysis of Modules in Logic Programming, A, 79

Metainterpreters for Expert System Construction, 163

Negation as Failure Using Tight Derivations for General Logic Programs, 109

OR-Parallel Prolog in Flat Concurrent Prolog, 243

Preface to Special Issue: Third IEEE Symposium on Logic Programming, 1
Prolog: Subsumption of Equality Axioms by the Homogeneous Form, 45

Some Results on the Complexity of Exploiting Data Dependency in Parallel Logic Programs, 229

Term Matching on Parallel Computers, 213
Third IEEE Symposium on Logic Programming: Special Issue, 6(1), (2)
